#### ATTACHMENT "A"

#### Payment Provisions and Work Responsibilities

#### Description of the Estimated Cost of the Items of Work

The Project includes the entire Mesquite Section from North of Town East Blvd. to U.S. 80. Due to scheduling, funding and logical sequencing the project will need to be broken into two phases. Phase 1 will be for Towne Centre Drive and associated ramp and roadway improvements; and Phase 2 will be for Town East Blvd and associated ramp and roadway improvements. This will necessitate the preparation of two sets of plans, specifications and estimates (PS&E), arrangement of two funding payment schedules and the administration of two construction projects.

For identification, accounting and participation purposes the Project will be broken into eleven (11) discrete parts, see attachment "B". The eleven (11) parts are listed below and are generally separated into their respective Phase 1 and Phase 2 components. These parts will become the basis for payment percentages to be applied to the project for the City and State shares of the construction costs.

#### Phase 1 - Towne Centre Drive

- Part 1 Replace the existing 4 lane Towne Centre Drive underpass with a new 6 lane structure to include a U-turn on the north side, reconstruct the Towne Centre Drive intersection approaches to match existing conditions and reconstruct the frontage road intersections. This includes an amount for urban design treatments on the bridge and surrounding area.
- Part 2 Relocate and reconstruct the southbound Town East Blvd. entrance ramp and the southbound auxiliary lane from the ramp to the U.S. 80 interchange.
- Part 3 Construct the new Towne Centre Drive southbound exit ramp.
- Part 4 Relocate and reconstruct the northbound Town East Blvd. exit ramp and the northbound auxiliary lane from the U.S. 80 interchange to the ramp.

#### Phase 2 - Town East Blvd.

- Part 5 Reconstruct the west half of the Town East Overpass, a southbound auxiliary lane over Town East Blvd. This includes an amount for urban design treatments on the bridge and surrounding area.
- Part 6 Reconstruct the east half of the Town East Overpass, a northbound auxiliary lane over Town East Blvd. and a new Town Centre Drive northbound entrance ramp. This includes an amount for urban design treatments on the bridge and surrounding area.
- Part 7 Reconstruct the Town East Blvd. frontage road cross street intersections and portion under the overpass.

| Project | Number                   |

- Part 8 Reconstruct the Town East Blvd. intersection approaches to the frontage road intersections.
- Part 9 Reconstruct and revise profile of the northbound frontage road approaching Town East Blvd.
- Part 10 Install traffic signals at North Mesquite Drive.
- Part 11 Replace I.H. 635 mainlane pavement including shoulders, median barrier, illumination and signing from south of Town East Blvd. to south of Towne Centre Drive.

The City and the State, as outlined in Attachment "C", will pay for or share in the construction cost of each of the project parts as identified. The estimated total construction cost for the Project is \$28,861,705. The City's estimated total share of the construction cost of the project is \$6,357,558. The State's estimated total share of the construction cost of the project is \$22,504,147.

The City will also pay, in addition to the construction costs, for the design engineering, preparation of the right-of-way maps, property deed research, right-of-way acquisition, and identified utility relocations in the cross street transition approaches for a total estimated cost to the City of \$ 9,299,397.

The State will also pay, in addition to the construction costs, for the reimbursable portion of the utility relocations within State owned right-of-way, all review costs, and all construction engineering and contingency costs for an estimated total cost to the State of \$39,184,467.

#### A. ACQUISITION OF RIGHT-OF-WAY

(1) The City shall assume all costs in providing the State fee simple title free and clear of all liens and encumbrances for all land used as right-of-way for the State Highway System. The City must comply with the requirements of Title III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Title 42 U.S.C.A. Section 4601, et seq., and documentation to support such compliance must be maintained and must be made available to the State and its representatives for review and inspection. Title right-of-way shall exclude oil, gas and sulfur which can be removed from beneath the surface of the land without the right in the owners thereof for ingress or egress to or from the surface of the land for the purpose of exploring, developing, drilling or mining the same. The City shall secure and provide to the State the required easements or fee title to any other land, such as that required for drainage outfall channels, wetland mitigation, and detention ponds, in addition to normal right-of-way as may be indicated on the approved right-of-way map. The State will provide the City standard deed forms used by the State in acquiring highway right-of-way and such forms will be used by the City in conveying title to the State. Title to the acquired right-of-way shall be secured in the name of the State or should be conveyed to the State by the City if previously acquired in the name of the City. Any deletions, additions or modifications of the forms must be approved in writing by the State.

(2) All right-of-way acquired by the City for purposes of constructing the Project shall be free and clear of all hazardous materials and contaminants. All costs associated with the detection and remediation of the hazardous materials and contaminants shall be borne by the City. When required by the State, the City shall provide written documentation from appropriate regulatory agencies that all known hazardous materials and contaminants have been removed from the right-of-way.

#### B. RIGHT-OF-WAY DESCRIPTION

The City shall assume all costs in preparing right-of-way maps, property descriptions and other data as needed to properly describe the right-of-way which the City is to acquire and provide to the State.

#### C. RELOCATION ASSISTANCE

The State shall assume all costs of providing relocation assistance as may be determined to be eligible under the Relocation Assistance Program. The State will comply with Title II of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, Title 42 U.S.C.A. Section 4601 and et seq. Documentation to support such compliance must be maintained by the State.

#### D. <u>UTILITY RELOCATION</u>

The City and State will provide all necessary utility relocation/adjustments costs as estimated and indicated in Attachment "C".

#### E. PRELIMINARY ENGINEERING AND PLAN PREPARATION

- (1) The City shall assume all costs in preparing or causing to be prepared the Project's preliminary engineering necessary for the development of the plans, specifications and estimates (P.S.& E.). The P.S.& E. shall be developed in accordance with the State's 1995 Standard Specifications for Construction of Highways, Streets and Bridges or its currently approved revisions.
- (2) The State shall review all engineering documentation, including the P.S.& E. upon completion or at any time it is deemed necessary by the State. Should the State determine that the engineering plans or portions thereof are unacceptable, the City shall, at its own costs, correct the documents to the satisfaction of the State. The City shall prepare and submit all engineering documentation to the State for acceptance and approval.

#### F. <u>CONSTRUCTION</u>

The State will advertise for construction bids, issue bid proposals, receive and tabulate the bids and award a contract for the desired construction in accordance with applicable laws and procedures. Field changes, supplemental agreements, or additional work orders which may become necessary subsequent to the award of the contract shall be subject to the approval of the State.

#### 2. SCHEDULE OF PAYMENT

In an effort to accelerate the <u>Phase 1</u> project the City of Mesquite has agreed to fully fund the balance of the <u>Phase 1</u> project with their total construction responsibility amount for <u>Phase 1</u> and <u>Phase 2</u>.

The project is principally funded from three sources of funding;

- 1. The City of Mesquite
- 2. TxDOT Surface Transportation Program Metropolitan Mobility (STP-MM)
- 3. TxDOT Texas Transportation Commission Strategic Priority (Category 12)

<u>Payment # 1</u> - Prior to thirty days before the <u>Phase 1</u> project is let, the City shall provide to the State seventy five (75%) of the City's commitment share of the estimated construction costs for Phase 1. This is estimated in the amount of \$4,768,168 which does not include any construction engineering or contingency money. Those costs are to be paid by the State.

Payment # 2 - Prior to six (6) months after the Phase 1 project is let, the City shall provide to the State twenty five (25%) of the City's commitment share of the estimated construction costs for Phase 1. This is estimated in the amount of \$1,589,389 which does not include any construction engineering or contingency money. Those costs are to be paid by the State.

#### 3. Actual Cost Agreement

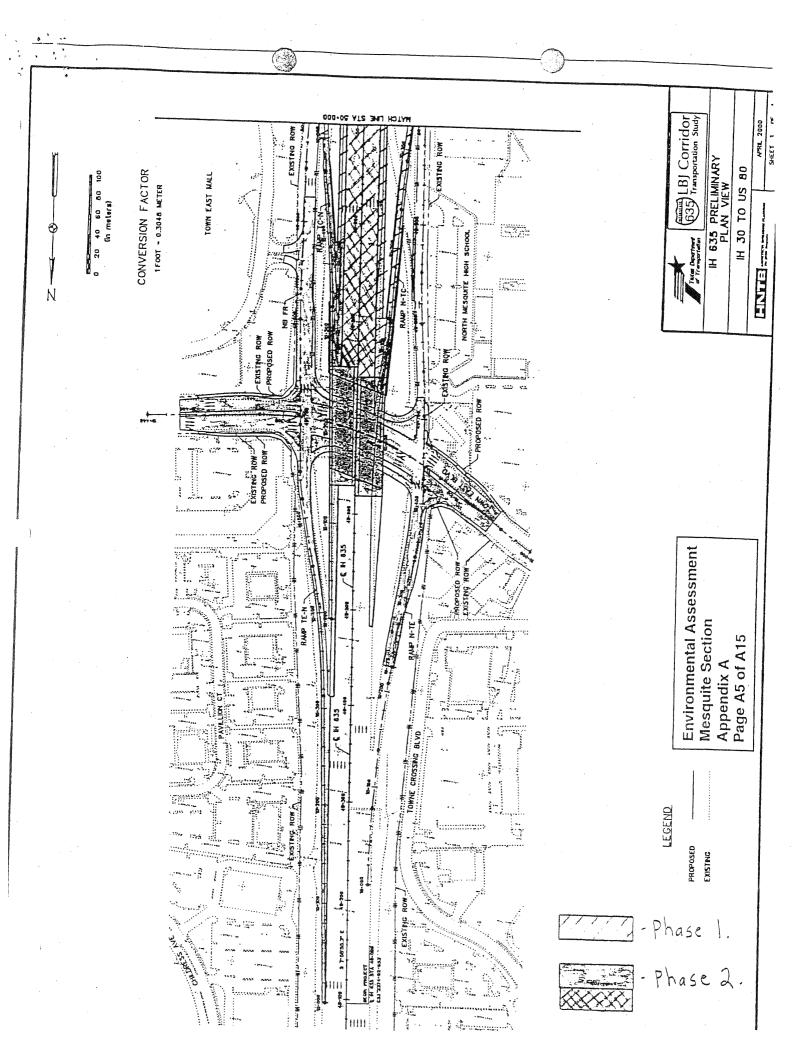

The City and State shall be responsible for the costs associated with right-of-way acquisition, right-of-way map and deed preparation, relocation assistance, utility relocations, plan preparation, and construction as outlined in Attachment "C".

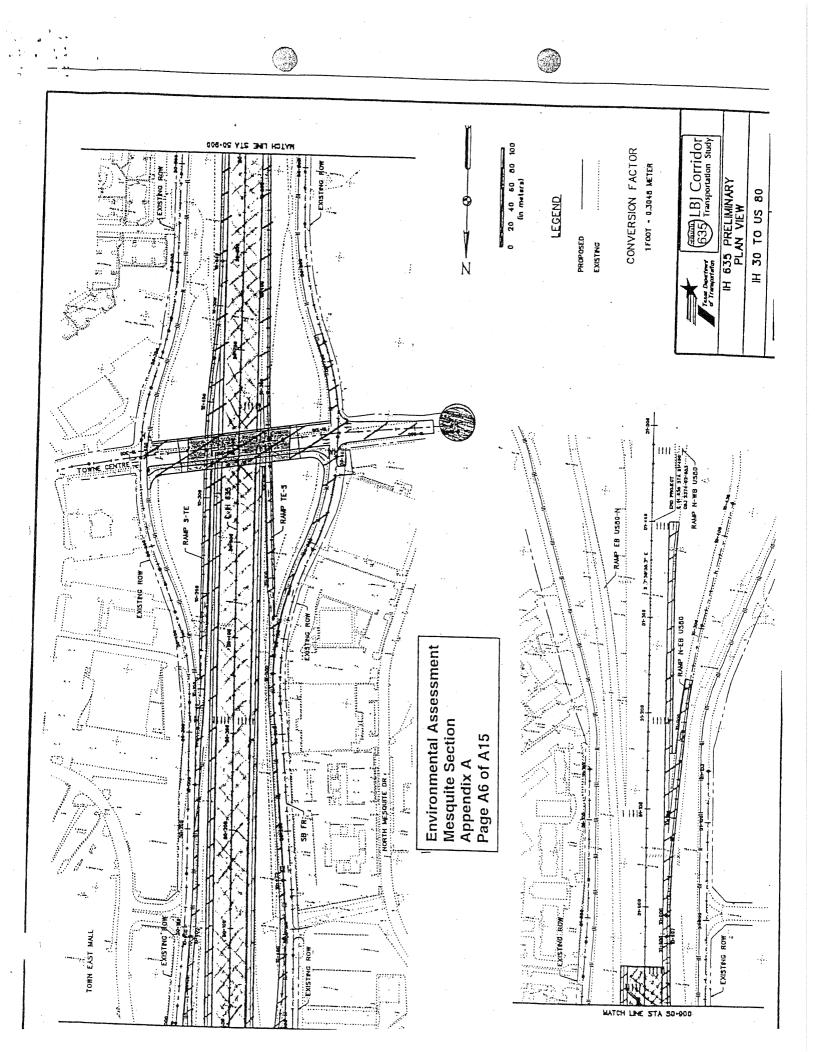

Upon completion and acceptance of the services established herein, the State will prepare a final audit of all costs for which it has incurred. Upon completion of the audit, any remaining funds due the City will be promptly returned.

| 12-06-2004 | 7                   | Resolution-Amending LBJ (Mesquite Section) Phase Two Advance Funding Agreement | 1 OF 1 |

#### BACKGROUND:

The LBJ (Mesquite Section) Project is the first project to begin construction along the LBJ Corridor Improvements from U.S. Highway 80 to Luna Road. The Mesquite Section project consists of relocating four entrance/exit ramps, adding two ramps along IH 635 from Town East Boulevard to U.S. Highway 80, adding auxiliary lanes to IH 635 and reconstructing the Towne Centre Drive and Town East Boulevard bridges.

The project was designed in two phases to expedite the construction of the access to the Towne Centre Drive area. The Phase One Improvements consisted of reconstructing the Towne Centre Drive bridge, adding an exit ramp for southbound traffic to Towne Centre Drive, relocating the southbound entrance ramp of IH 635 from Town East Boulevard and relocating the exit ramp for northbound traffic on IH 635 to Town East Boulevard. These improvements have been completed. During the design of the Phase Two Improvements, the Texas Department of Transportation (TxDOT) agreed to include the design and construction of improvements for the westbound IH 30 to southbound IH 635 ramp and the southbound frontage road of IH 635 from IH 30 to Town East Boulevard.

## FINANCIAL IMPLICATIONS:

TxDOT has agreed to construct the additional improvements for the IH 30/IH 635 ramp and southbound frontage road of IH 635 from IH 30 to Town East Boulevard with the Phase Two Improvements. Amendment No. 3 to the TxDOT Advance Funding Agreement requires the City to pay the engineering design fee for this additional work while TxDOT will fund the construction. Amendment No. 3 will credit the City's participation for Phase Two construction (\$6,357,558.00) by the engineering design fee (\$742,271.00). This additional construction does not increase the City's participation cost in the Mesquite Section project.

#### RECOMMENDATION/ACTION DESIRED:

Staff recommends the City Council approve a resolution authorizing the Mayor to execute Amendment No. 3 to the Advance Funding Agreement with TxDOT for the LBJ (Mesquite Section) Phase Two project to include the design and construction of improvements to the westbound IH 30 to southbound IH 635 ramp and the southbound frontage road from IH 30 to Town East Boulevard.
